

Adaptive Training

Certification

Being Adaptive Certified validates your proficiency with Adaptive products, elevates your value within your organization, and helps you drive further professional success.

Adaptive Planning
Adaptive Reporting

Certification Programs

Join the ranks of the Adaptive Certified and be recognized as the Adaptive authority within your organization. You'll demonstrate your proven expertise and gain the confidence to manage and grow your organization's deployment. With thousands of organizations already using Adaptive, being Adaptive Certified provides a strong professional foundation to grow your career and further success.

Certification Process

Adaptive Planning and Reporting certification is awarded to those who pass three internet-based exams. Ongoing education opportunities and annual re-certification ensure that you're always up to date with the newest features and functionality.

"I'm looking forward to being Adaptive Certified! I've experienced so many benefits with Adaptive and I really want to expand my skill set and drive greater success for my company."

– Maria Manzano
Forecasting Manager, United Data Technologies

ADAPTIVE PLANNING

To be Adaptive Planning Certified, you must pass two exams. We recommend that you take the Adaptive Planning Implementation training course and have at least 6 months of experience managing a Planning model. You will be tested on foundational principles such as security and roles, populating the model, and creating and maintaining versions, as well as other topics such as sheet basics, formulas, performance, and more.

ADAPTIVE REPORTING

To be Adaptive Reporting Certified, you must pass one exam. The Adaptive Reporting Design and Administration class is the perfect foundation for this certification, which covers matrix reports, modeled reports, calculations, attributes, formatting options, templates, and more.
